How to read the catalogue

The catalogue contains 110 Poczta Polska entries and 13 PZKF entries. The PP and PZKF numbering belongs to this publication and does not replace issuer or philatelic-catalogue numbering. In Part I, the principal issue blocks are ordered chronologically by the first item in each collection. PP numbering follows the order of entries in the catalogue. In Part II, PZKF items are grouped by type: Membership Cards, Crypto Prints, Cryptophilatelic Ducats and Crypto Pralines, with chronology retained inside each group. Variants receive separate numbers when the official PZKF catalogue identifies a separate representative token. All elements of an issue remain together, ordered as the primary item, variants, cover, folder and later NFT transformations. Individual dates remain in the tables. Each description identifies what distinguishes the specific item.

PHYSICAL + NFT

A paper or numismatic item is directly linked to a token. The ratio shows how many NFTs correspond to one physical copy.

NFT-ONLY

The token has no dedicated 1:1 physical counterpart. It may reuse an earlier stamp design without forming an ownership pair with it.

REPRESENTATIVE TOKEN ID

The official PZKF catalogue identifies an example token for a variant. Where every copy has an individual identifier, it is not the number of the whole category.

NFT COUNT

For multi-copy tokens, supply was read directly from Polygon contracts on 27 August 2026. Confirmed issuer print runs were used for physical 1:1 series. New entries PP 099-110 were compiled separately; their data dates are stated with the sources.

Precautionary rule: missing confirmation has not been replaced by speculation. Such fields are marked unconfirmed, and every material source conflict is stated beneath the entry. Where the issue date is unknown, the first NFT mint is listed separately and is not treated as the physical issue date. Reproductions are genuine issuer files or images from the official PZKF catalogue; no collectible has been reconstructed with AI.

PART I - POCZTA POLSKA

A collector's listing of officially catalogued Poczta Polska tokens and hybrid collectibles. Issues are arranged chronologically by their opening date, while all related variants, covers and folders remain together in one block.

Polish Crypto Stamp

'The Crypto Stamp expresses attachment to the traditional role of the postal service and openness to developments in NFTs, which Polish and foreign organisations are successfully using to make their offerings more attractive. Poczta Polska is a company that most of us associate with tradition and a rich history spanning almost five centuries. Times are changing, however, and we are keeping pace. We are adapting our operations to the realities of an increasingly digital world, as reflected, among other things, in the Crypto Stamp project.' - Krzysztof Falkowski, then President of Poczta Polska.

How to read the fields

An NFT is a digital collectible. The paper print run is listed separately; it is not the number of NFTs. Token ID is the token's number in the collection. The first and last numbers are shown; (...) means that the list continues. The collector number is used to assemble matching sets. It differs from the Token ID and the PP catalogue number. Polygon is the blockchain on which the NFTs are recorded. ERC-721 and ERC-1155 are technical token standards. The contract address identifies the collection on that blockchain. OpenSea is a website for browsing NFTs.

Contract address	0xae9387e78bc72cf62f9252de7fc42e038b46f		

The perforated version comprises 34 individually numbered new prints. Each has its own graphic personalisation and an assigned NFT. For this version, the new print number matches the Token ID: for example, no. 01 is token 1 and no. 34 is token 34.

PP 103

34th WOŚP Finale - imperforate new print with NFT

New print no. 01
NFT: Token ID 35 - OpenSea
Illustration of the digital counterpart

Collection	34th WOŚP Finale - new prints	Presentation date	09.01.2026 (physical edition)
Issuer	Poczta Polska S.A.	Manufacturer	Polska Wytwórnia Papierów Wartościowych S.A.
Variant	Imperforate	Paper print run	34 numbered new prints of this version
NFT count	34 tokens of this version; one copy of each token	Physical/NFT link	One NFT assigned to each physical new print

The imperforate version comprises 34 new prints with assigned NFTs. The number shown on the new print differs from the Token ID: no. 01 has token 35, no. 02 has token 36 and no. 34 has token 68. The full mapping for both versions is shown on the next page.

Complete list of 68 NFTs - go to page 41

What this issue includes

The issue comprises 68 new prints with 68 NFTs: 34 perforated and 34 imperforate. They were offered at charity auctions for the 34th Finale of the Great Orchestra of Christmas Charity (WOŚP), in gift packaging secured with a wax seal. The auction proceeds supported the Finale's charitable objective.

Distinguishing dates and print runs

The date 25.01.2026 and the print run of 114,000 refer to ordinary postage stamp no. 5494, whose design was used for the new print. They do not refer to the NFT creation date or to the edition of 68 new prints.

* The OpenSea preview displays an image. The source file format and the presence of any animation or audio have not been confirmed. The exact NFT creation date also remains to be verified.

PART II - PZKF

Issues of the Polish Cryptophilatelists Association are arranged in collector-friendly blocks: Membership Cards, Crypto Prints, Cryptophilatelic Ducats and Crypto Pralines. Chronology applies within each group. Physical items produced to PZKF's order are not automatically attributed to Poczta Polska as the NFT issuer.

PZKF - mission and activities

The Polish Cryptophilatelists Association is Poland's leading organisation dedicated to cryptophilately - a modern field of collecting that combines traditional philatelic items with blockchain technology and NFT tokens. The Association aims to fill a gap by creating a platform for sharing knowledge and experience and for bringing together everyone fascinated by crypto-collecting and blockchain technology. It is a space open both to experienced collectors and to those just beginning their journey in this fascinating digital world.

Token ID	not publicly confirmed	Verification	PZKF-W + Polygon
Contract	0xdb91b6701E151FCCCF374d917d7F9a95dCf9c90F		

The first PZKF Ducat was a digital reward for community activity. It functioned more like a participation badge than a conventional retail product.

Discrepancy / note: The official catalogue does not state a closed NFT edition size.

PZKF 007 Cryptophilatelic Ducat 1.0 #CD1-XXX/2

Collection	Cryptophilatelic Ducats	Issue date	29.11.2025
Issuer	Polish Cryptophilatelists Association (PZKF)	Variant / perforation	#CD1-XXX/2
Physical issue	none	NFT count	max. 200

Editorial notes

- NFT counts derived from contracts reflect the confirmed supply at the time of reading. For issues with individual Token IDs, edition size was established from issuer documentation because totalSupply for each identifier is 1.
- The issue price is not a secondary-market price. Where an item was a reward, gift or part of a membership fee, the distribution method is stated instead of an artificial price.
- First NFT mint means the earliest confirmed transfer from the zero address in the relevant contract. It is a blockchain-event date and not automatically the official issue date of the physical item.
- For Crypto Postcards, track titles are listed in the table; descriptions add the artwork's authorship and museum inventory number, plus performer, conductor and recording date, according to NFT metadata.
- Images were obtained from the official PZKF catalogue, IPFS locations referenced by token metadata and the PZKF website. All are embedded and available offline.
- Unconfirmed is a deliberate catalogue statement: it denotes insufficient source evidence, not an editorial omission.
